

A RETREAT FOR HEALTH SYSTEM BOARD MEMBERS

Boards That Care

Gain the knowledge, skills, tools, and strategies to support executive leadership in advancing person-centered care.

Boards That Care is an innovative program that supports healthcare organization board members and executives in their important role as stewards of care. Designed to complement traditional board training, Boards That Care offers language, tools, and strategies to keep care at the center of the board agenda, alongside traditional governance priorities.

Elevating careful and kind care as an ever-present topic in the boardroom offers new ways to solve for issues like clinician burnout, staff turnover, and patient experience and a different lens through which to consider investment, innovation, and growth strategies.

Join us for a program that will change the way you think about the centrality of care and help you identify new ways to bring your own experiences and skills to your role as a Board member. You will leave this retreat inspired, motivated, and with new connections and partners to lean on as you and your organization strive to fulfill your mission to care.

Who should come?

This retreat is primarily designed for board members of non-profit healthcare organizations in the United States. We encourage multiple members of the same board to attend and share in the learning together.

Next steps

To nominate someone or get more information about how to register, reach out to Sheila Moroney, Executive Director of The Patient Revolution (sheila@patientrevolution.org) or Thor Wasbotten at Markkula Center for Applied Ethics. (twasbotten@scu.edu)
